### REFRACTION WAIVER FORM

Refraction is the procedure during which the doctor or ophthalmic technician checks your vision to determine an accurate eyeglass prescription. It is also important to help determine the cause of blurry vision and check if any change in prescription can improve your vision.

**Medicare and most private insurance companies will not pay for refraction. QMB does not cover the fee as it is not a Medicare covered service.**

**The out-of-pocket cost is \$55.**

**When refraction is not a covered benefit, you are responsible for this charge.**

You can choose **not** to have refraction performed today. Please be aware that by waiving the refraction today, you **will not** be able to receive a new eyeglass prescription. Should you need a new prescription later, you will need to come back to our office to undergo refraction.

**I have read the above and elect:**

Not to undergo refraction during my visit today. I understand that in case I need a valid eyeglass prescription in the future, I will have to come back to undergo refraction.

To undergo refraction today. Payment is due at the time of service. The exam and refraction will be billed to my insurance, and I understand that I will be responsible for any balance that my insurance does not cover.
